

You were reading a novel. After 5 minutes you received a phone call. So you took the call and talked over the phone for 3 minutes. At that time your door bell rang and you got a courier. For signing and getting the courier you took 4 minutes. Then you continued the phone call for 2 minutes and novel reading for 5 minutes.

1. Identify this Scheduling algorithm. Write it on your notebook and raise your hand.
 2. Prepare the input for this program.
 3. Display the table.
- [No need for Gantt chart and sorting]
