**Programming Assignment 22 – Internal Mark Calculation Application using PHP**

---

Develop Internal Mark Calculation system in PHP that facilitates a student to view the internal marks for a particular subject and a faculty to perform the operations given in the following snapshot. Create the following tables. During every operation, subject code has to be retrieved from the faculty. Faculty inserts one record at a time using formcontrols.

## Internal Marks Calculation System

Student's Operations	Faculty Operations
<p>Register Number: <input style="width: 100%;" type="text"/></p> <p>Subject Code: <input style="width: 100%;" type="text"/></p> <p style="text-align: center;"><input type="button" value="View Internal Marks"/></p>	<p style="text-align: center;"><input type="button" value="Insert"/></p> <p style="text-align: center;"><input type="button" value="Delete"/></p> <p style="text-align: center;"><input type="button" value="Update"/></p> <p style="text-align: center;"><input type="button" value="Calculate"/></p> <p style="text-align: center;"><input type="button" value="List"/></p>
