Programming Assignment 24 - Implementation of Sale Prediction using Webservice

Write web service **SalePrediction** to connect with the database to retrieve the sale details for any given product and to find the predicted sale value for 2017. Write a web service client to consume the **SalePrediction** service to get the predicted value for the given product. Create a database product with the details of the product, namely, its id, name, p_2014, p_2015 and p_2016. Populate the table with 20 records. Refer the following snapshot to design web service client.

Sale Prediction System

Samsung Mobile ▼

Get Sale Prediction

The average prediction for the product **Samsung Mobile** is **28,765**
