Programming Assignment 15 - Online Shopping Application using MVC with Servlet, JSP and Cookies

Write an online shopping application using Servlet and Cookie session tracking mechanism. Realize shopping cart for each user to store their items. The following figure shows the online ordering of the food items in the Pizza Corner. **'Select Category'** shows the various food items. Left column shows the description of the food items, cost, quantity and a '+' to add item to the cart. **'Your Cart'** shows that the items selected at particular item with quantity. In addition, it also shows the total cost of the items in the Cart. Update is used to calculate the current cost if there is any change in the quantity and into mark is used to delete an item from the cart. Simulate the scenario with different web pages using Servlet and Cookies.
