Programming Assignment 16 - Implementation of LiveSearch Application using AJAX

Develop AJAXLiveSearch web application to contact the server behind the scenes using AJAX technique, to bring the common search items in drop-down menu that might match what the users are typing. It enables the user to select one of those terms and click it in the menu.

The screenshot shows a web browser window with a search results table. The table has two columns: the search term and the number of results. The search term 'ajax' is entered in the search bar, and the results are displayed in a table. The first row is highlighted in grey.

Search Term	Results
ajax	3,840,000 results
ajax amsterdam	502,000 results
ajax fc	710,000 results
ajax ontario	275,000 results
ajax grips	8,860 results
ajax football club	573,000 results
ajax public library	40,500 results
ajax football	464,000 results
ajax soccer	407,000 results
ajax pickering transit	10,700 results
